- | PROJECTS |
|----------|
|----------|
- **JourneyPal - IIIT BANGALORE HACKATHON (METAVERSE)**
 - Enhanced travel experiences by designing a project that streamlined planning with personalized itineraries and honest reviews. Focused on safety, convenience, and accessibility to ensure a stress-free journey. Worked as a project designer in a team of three under mentor guidance.
 - **GPTecho - CODE HIVE HACKATHON (BOBBLE AI)**
 - Developed an AI assistant for autonomous task generation and prioritization, integrating multiple OpenAI models. Built with a React frontend and Express backend, it focused on AI autonomy and real-time interaction. Future enhancements include multimedia processing and speech functionalities. Contributed as the project designer and developer.
 - **EDUSAATHI - SMART INDIA HACKATHON 2024**
 - Led the development of an AI-powered Student Assistance Chatbot for the Department of Technical Education, Rajasthan. Streamlined communication and decision-making for students while implementing performance-enhancing upgrades. Guided a diverse team through challenges as team leader.
 - **Lawyers Interactive Website Development**
 - Created an interactive website for lawyers with features like a virtual law library, case timeline, expense calculator, and chatbot. Enhanced client engagement through user-friendly interfaces, dynamic content, and real-time data integration, ensuring seamless functionality across devices and browsers.
 - **Airline Reservation System**
 - It is a java majored project. Airline Reservation System mainly aim is to provide the online ticket & seat reservation of National and International Flights and also give us the information about flight departures. It is a java majored project.
 - **Python Game Development**
 - It's a Python based project. The game is basically the snake game which was cute famous in early 2000s. The aim of the game is to collect the dots i.e. foods, and avoid the obstacles. As you collect the food, the snake gets longer.

RESPONSIBILITY & EXPERIENCE

- **Web Development intern | [BharatDatacenter](#)**

[Jan’25 - Present]

 - Developed and optimized web-based solutions using modern frameworks, enhancing user experience and performance. Collaborated with teams, ensured seamless functionality through testing and debugging, and contributed to efficient deployment of projects.
- **Trainee | Wipro Training Program**

[Jan’25 - Present]
